About Me

As an analytical thinker with a penchant for solving problems, I believe that technology can be used to create positive change. Before I found my niche in web development, I worked as an economist and learned to identify and describe problems. Now, through lines of code, I am excited to be creating solutions.

Experience

General Assembly — *Web Development Immersive Program*

October 2015 — January 2016

- Built fluency in full-stack web development through completing an intensive three-month program
- Focused on common best practices in object-oriented programming, MVC frameworks, data modeling, and test-driven development

IHS — *Economist*

October 2014 — October 2015

- Forecasted prices for transportation goods and services using econometric modeling techniques in EvIEWS
- Contributed written analysis to quarterly IHS publications corresponding with key transportation industries in North America and Europe

University of Pittsburgh — *Teacher's Assistant, Economics Tutor, Tour Guide*

August 2010 — April 2014

- Spoke with clarity and confidence about complex topics
- Adjusted lessons and presentations to the needs of students and campus guests

Volunteering

U.S. Botanic Garden — *Educator*

November 2015 — present

Casey Trees — *Team Leader Candidate*

October 2014 — present

Washington English Center — *English Tutor*

February — April 2015

Worldwide Opportunities on Organic Farms — *Worker for Chilean Fruit Farm*

June 2014

Technical Skills

Languages

Ruby
Javascript
HTML
CSS

Frameworks & Libraries
